Frameworks: SvelteKit, Angular, React

Backend & Databases: FastAPI, Supabase, PostgreSQL, SQLite, REST APIs

Tools & Infrastructure: Git, Docker, Linux, n8n, DigitalOcean, Vercel, Figma

EXPERIENCE

Kyrios Solutions Inc., Makati - *Technical Product Solutions Specialist*

Sep 2025 - PRESENT

- Engineered a NeoLMS user activity dashboard using SvelteKit, automating account monitoring and bulk archiving for 15,000 user accounts in 30 minutes.
- Developed an n8n workflow to automate client letter-of-intent distribution to 200+ leads through scheduled, rate-limited execution, reducing manual outreach by 8 hours/week.
- Took ownership of a React and FastAPI middleware on a Docker VPS that integrates the school's management system with the LMS, keeping the connection running through DepEd's three-term transition.
- Trained 100+ students, teachers, and administrators across 10 schools and government institutions through LMS onboarding, technical support, and troubleshooting.

Freelance, Remote - *Software Developer*

Aug 2024 - May 2026

- Built and deployed Paravan for a client, a van-hailing web app (SvelteKit, Supabase Realtime) used by USLT students and presented by the client to DOTr Region 2.
- Built TechTalk for a student thesis team, an Angular and TypeScript AAC web app for students with complex communication needs, featuring a symbol-based phrase builder and native Angular text-to-speech.

EDUCATION

University of Saint Louis Tuguegarao — Cagayan, Philippines

Bachelor of Science in Computer Science | Aug 2022 - Jun 2025

AWARDS

Two-time Gawad San Luis Awardee for Excellence in Innovation, Creativity, and Agility:
Champion, Regional Hackathon (2023);
Champion, Hack for Gov 3 – Region 2 (2024).
